

SHRESHTHA SHARMA

BCA Student — Data Science & AI Specialization

+91-9305101088 | shreshtha2sh@gmail.com | Lucknow, Uttar Pradesh | Portfolio: shreas0.github.io/pf

OBJECTIVE

A motivated second-year BCA student specializing in Data Science and Artificial Intelligence, seeking an internship or entry-level role to apply hands-on skills in Python, React.js, and data analysis. Eager to contribute to data-driven projects and grow in a dynamic, technology-focused environment.

EDUCATION

Bachelor of Computer Applications (BCA) | SRMU Barabanki

2023 – May 2027

- Specialization: Data Science and Artificial Intelligence
- Expected Graduation: May 2027

Higher Secondary (Class XII) | Sky Public School, Lucknow

2010 – 2023

PROJECTS

Check out my portfolio for all projects:

Face Unlock for Windows 11 | Personal Project

2026

- Built a native Windows 11 face-unlock system pairing a C++ Credential Provider (COM DLL) with a Python biometric daemon, communicating over named pipe IPC to authenticate directly at the lock screen.
- Implemented face recognition using InsightFace (RetinaFace detection + ArcFace embedding) with MediaPipe-based blink liveness detection to resist photo spoofing, and DPAPI-encrypted local credential storage for secure session unlock.
- Diagnosed and resolved deep systems level issues process isolation, interpreter environment conflicts, and boot time race conditions to make biometric authentication reliable from cold boot.
- **Tech Stack:** C++ (Win32/COM), Python, OpenCV, ONNX Runtime, InsightFace, MediaPipe, Windows Named Pipes/DPAPI

Attendance Management System | Personal Project

2024

- Built a full stack Attendance Management System using React.js with role-based access for teachers and students, enabling daily attendance marking and record keeping via localStorage.
- Implemented auth simulation using JSON mock data and React hooks for session management; students can filter attendance history by roll number.
- **Tech Stack:** React.js, React Router DOM, JavaScript, CSS3, localStorage, JSON

Simple Chatbot | Personal Project

2025

- Built a Streamlit based chatbot in Python that uses spaCy NLP and cosine similarity to match user queries against prebuilt datasets, enabling semantic question answering with context memory.
- Implemented modular architecture (data processing, NLP vectorization, chatbot logic, UI) with caching for instant load times and built-in handlers for math, time/date queries, and greetings.
- **Tech Stack:** Python, spaCy, Streamlit, scikit-learn, Pandas, NumPy

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, C, C++
- **Frontend:** React.js, HTML5, CSS3, JavaScript
- **Data & Tools:** Pandas, Matplotlib, Seaborn, Microsoft Excel
- **Design Tools:** Adobe Photoshop, Adobe Premiere Pro, Canva
- **Other:** Git & Version Control, REST APIs, Windows Systems Programming, Linux, macOS, Windows

SOFT SKILLS

Problem-Solving | Creative Thinking | Attention to Detail | Time Management

LANGUAGES

- Hindi — Native
- English — Proficient
